

SPEED

(For 2 or more players – can be played in teams)

1. Place deck face down and select a player to flip the first card over quickly.
2. The first player to say the number, which, when added to the number in the center of the card equals the number family in the corner, gets to keep the card. That player also gets to flip over the next card from the top of the deck.
3. If two or more players say the answer at the same time, another card is flipped over for a tie breaker and the winner keeps both cards.
4. When the deck is depleted, the player with the most cards wins.
