

## OH NO!

(For 3 or more players)

1. Deal each player 7 cards and lay the remaining cards face down. This will be the draw pile. Turn the first card over and lay it next to the pile of cards. This will be the discard pile.
2. The player to the left of the dealer begins by laying down a card from the same number family (as designated in the corner of the card). If the player does not have a card with the same number family, they must either pick a card from the draw pile until they obtain that number family or they may lay down a card that has the same number and color in its' center as the card already laying in the discard pile

For example:

If a player is “out of” the 8 family, they may either choose from the draw pile or lay down any family that has a black 6 in the center.

3. The game is over when one player lays down his/her last card in the discard pile.
